| Project Name | Project – Crude Oil Price Prediction | | |
| Maximum Marks | 4 Marks | | |

Solution Architecture:

A complicated process with numerous sub-processes, solution architecture connects business issues with technological solutions. Its objectives are to:

- Use the LSTM technique to identify the best technological solution to address current issues in businesses.
- Explain the software's layout, traits, behaviour, and other features in order to anticipate crude oil prices more precisely.
- Offer guidelines for how the solution will be developed, managed, and delivered.

Solution Architecture Diagram:
